

# NinthBrain

## One Simplified Solution

### Cloud-Based Software

Ninth Brain Suite delivers all the tools you need, all in a single solution. It's completely affordable, customizable, and well suited for emergency, medical, or any other highly regulated business.

#### ① STEP ONE – Take a quick look at our suite of tools.

##### Learning Management System

Create courses and online exams, assign required training, and upload video-taped sessions to streamline education.

##### Credential Management

Track professional industry- and company-specific credentials, manage company requirements, and send automated alerts.

##### Workforce Scheduling

Use multiple shift patterns to create and auto-generate schedules for your teams. Use the timeclock feature to track attendance for payroll.

##### Quality Improvement Tracker

Track performance data while keeping everyone in the loop on incident investigations.

##### Run Log

Document and process QI activities associated with a run while keeping everyone in the loop with communication and alerts.

##### Risk Assessment

Conduct Risk Assessment and determine threshold level of risk with automatic notification alerting.

##### Form + Checklist Builder

Provide organized documentation with workflow communication and data reports.

##### Employee Health

Easily manage personnel records and track Employee Health events, immunizations, OSHA reportable events and more.

##### Central Calendar

Schedule, communicate, and administer company-wide or department-specific events.

##### Communication Tools

Create your own bulletin boards, announce events, and easily share company news.

##### Resource Center

Store and manage unlimited data such as company directory, safety data sheets, and more.

##### Real-Time + Scheduled Reporting

Templated or custom reports allow you to showcase compliance with accreditation requirements.
